WHICH POS IS RIGHT FOR YOU?

Flexible, advanced and modular payment platform

The Aria-PreHost Design allows for modular development of additional services. It is the leading edge for its advanced Mobile Device Management platform to be fully remotely managed with such features as remote key injection and multi-merchant acquiring on one device. This flexibility creates limitless services through merchant networks or touchpoints such as mobile wallets, utilities payments, micro-finance, SMB loans, inventory ordering systems, ticketing, loyalty, lottery, KYC and PrePaid Card activation, Top Up distribution, GCommerce and Ecommerce payments. All without requiring re-certification.
